Forget to mention that I found the answer here: A: Programmers don't break the rules, they just bend them to suit their needs. In this case you need to generate a CD key, and there's a link to where to do that.

New-generation fluoroquinolones: in vitro activity and antimicrobial synergy of rosoxacin, pipemidic acid and superoxol. The in vitro activity of rosoxacin, pipemidic acid and superoxol (a 4-cyanopyridine derivative) was evaluated. Four in vitro microbiologic assays (antibiotic Etest strips, time-kill curves, minimum inhibitory concentrations [MICs], and time-dependent kill) were used to evaluate the activity of three new-generation fluoroquinolones against multiresistant strains of *Staphylococcus aureus*, *Enterococcus faecalis* and *Enterobacter cloacae*. The findings were compared with those obtained with the ciprofloxacin, levofloxacin, moxifloxacin and gatifloxacin drugs. All three new fluoroquinolones were active against all strains. The time-kill study revealed that pipemidic acid showed interesting bactericidal effects within 30 min. Combinations of all three fluoroquinolones tested in association with rifampin or gentamicin did not show any antibacterial synergy. With his big, strong hands and his total command of the stage in the spotlight, Michael Flatley and the Irish Dancing – The Musical takes you on a voyeur's view into the last remaining centre of ancient Irish dancing in the UK. A fast-paced, powerfully staged show, featuring a roster of classic Irish dance styles including Camogie, Ceili, Solo, Ceol, Reel and Chip Jock, the show follows the passionate journeys of the dancers to search for the roots of Irish dancing as well as the heart of the dance itself. Ivor Marthins (co-director) has been designing and producing high-quality dance theatre for nearly 30 years. His highly successful shows include "Weaving the Tapestry", "The Cracks Come", "The Sound of Falling Scales"
